

The Microbiota and Individual Community Members in Colorectal Cancer: Is There a Common Theme?

Marc A Sze and Patrick D Schloss

Supplemental

Table S1: Bray-Curtis Distance Matrix Analyzed by PERMANOVA Adenoma Stool Studies

F statistic	R2	P-value	Study	Adenoma n	Control n
0.63	0.059	0.7562	Brim	6	6
1.85	0.021	0.0096	Zeller	37	50
1.04	0.003	0.3788	Baxter	198	172
1.01	0.001	0.3658	Hale	214	473

Table S2: Summary of Common OTUs for All Diagnosis Groups

**Table S3: Summary of Comparisons Based on Additive Treatment Received
(Chemotherapy or Chemotherapy and Radiation)**

Table S4: Summary of Adenoma based on Surgery Received

Table S5: Summary of mtry ranges used for the treatment and diagnosis models
